The Interim Final Rule (IFR) on DCA Access
Published in the *Federal Register* on July 19, 2005
Effective Date: August 18, 2005

This reference guide is intended to be used in conjunction with the official *Federal Register* notice to assist aircraft operators seeking access to Ronald Reagan Washington National Airport (DCA). Nothing in this guide changes or modifies requirements contained within the *Federal Register* notice. In the case of any discrepancies between this guide and the *Federal Register* notice, the *Federal Register* notice will take precedence.

**Can I Apply?**

The Transportation Security Administration (TSA) has developed a two-phase approach to restoring full access to DCA. In Phase 1, TSA will permit the following operations access to DCA:

1. Operators under a partial security program approved by TSA under 49 CFR 1544.101(b), which operate aircraft with a passenger seating configuration of 31 or more but 60 or fewer seats
2. Operators under a PCSSP approved by the TSA under 49 CFR 1544.101(f), which operate aircraft with a passenger seating configuration of 61 or more seats or a maximum certificated takeoff weight of 45,500 kg (101,309 pounds) or more
3. Operators in scheduled or charter service with a TFSSP approved by TSA under 49 CFR 1544.101(d), which operate aircraft with a maximum certificated takeoff weight of greater than 12,500 pounds
4. Aircraft operated by corporations

After one year, TSA anticipates evaluating the feasibility of implementing Phase 2, which may include the following operations:

1. Aircraft operated by private persons
2. Scheduled and charter operations in aircraft not otherwise required to be under security programs (maximum certificated takeoff weight of 12,500 pounds or less)

**If I Can, Now What Do I Do?**

1. **Step 1: Designate a Security Coordinator.** The security coordinator will be responsible for implementing the DCA Access Standard Security Program (DASSP) and other security requirements of the IFR. The operator must provide TSA with the security coordinator’s contact information and availability in accordance with the DASSP.
   a. The security coordinator must undergo a fingerprint-based criminal history records check (CHRC) to check for disqualifying offenses described in 49 CFR 1544.229(d). This requirement is met if the security coordinator has undergone a CHRC in accordance with another security program described in 49 CFR 1542.209, 1544.229 or 1544.230.
      i. Fingerprints must be submitted to the TSA
      ii. TSA will adjudicate the results of the CHRC
iii. Either the Transportation Security Clearinghouse (AAAE) or NATA Compliance Services (NATA) can be used to process the fingerprints

b. The security coordinator must undergo a security threat assessment conducted by TSA. This will require the security coordinator to provide TSA with:
   i. Legal name, including first, middle, last; any applicable suffix; and any other names used
   ii. Current mailing address, including residential address if different than current mailing address
   iii. Date and place of birth
   iv. Citizenship status and date of naturalization if the individual is a naturalized citizen of the United States
   v. Alien registration number, if applicable
   vi. Social Security number is requested to expedite the threat assessment process, but is not required

2. **Step 2: Request, Receive and Adopt the DASSP**
   a. TSA will verify that the operator is a valid operator
   b. TSA will require the operator to sign a non-disclosure agreement in order to receive the DASSP
   c. The operator implements the DASSP
   d. The operator informs the TSA upon completion of the implementation of the DASSP
   e. TSA will inspect the operator to ensure compliance with the DASSP
   f. Upon successful completion of the TSA review, the operator may now apply for a waiver to operate into DCA

3. **Step 3: Perform Background Checks for Flightcrew Members**
   a. Each flightcrew member assigned to flights operating into and out of DCA must undergo a fingerprint-based CHRC. This check is not required of cabin crewmembers.
      i. This check is met if the flightcrew member already has undergone a fingerprint-based CHRC in accordance with 49 CFR 1542.209, 1544.229 or 1544.230
      ii. A crew member with disqualifying offences will not be allowed to operate aircraft into or out of DCA
   b. Each flightcrew member must undergo a check of his or her FAA record. The flightcrew member must not have any record of the following violations, or he/she will not be allowed to operate an aircraft into or out of DCA:
      i. A prohibited area
      ii. A flight restriction established under 14 CFR 91.141
      iii. Special security instructions issued under 14 CFR 99.7 (ADIZ or defense area)
      iv. A restricted area designated under 14 CFR Part 73
      v. Emergency air traffic rules issued under 14.CFR 91.139 (emergency conditions)
      vi. A temporary flight restriction designated under 14 CFR 91.137 (vicinity of a disaster or hazard area), 91.138 (national disaster area in the state of Hawaii) or 91.145 (management of aircraft operations in the vicinity of aerial demonstrations and major sporting events)
      vii. An area designated under 14 CFR 91.143 (flight limitations in the proximity of space flight operations)
I’ve Done All The Checks, Now We’ve Got A Flight

1. The operator must apply for and receive a tentative reservation from the FAA for a slot for each flight into and out of DCA. This will be implemented using the existing Airport Reservation Office (ARO) program for DCA that was suspended after September 11, 2001. NBAA expects that these slots will become available 96 hours in advance of the desired operating times instead of the usual 72 hours (this will change at DCA, but ORD and LGA will remain 72 hours). This requirement is being established to account for the 24 hours in advance notice discussed in the next paragraph. Upon receiving the tentative slot reservation, the operator must submit the following information to the TSA at least 24 hours in advance of the aircraft departure:
   a. For each passenger and crewmember (both flightcrew and cabincrew):
      i. Legal name, including first, middle, last; any applicable suffix; and any other names used
      ii. Current mailing address, including residential address if different than current mailing address
      iii. Date and place of birth
      iv. Citizenship status and date of naturalization if the individual is a naturalized citizen of the United States
      v. Alien registration number, if applicable
   b. The registration number of the aircraft
   c. The flight plan
   d. Any other information required by TSA

2. Upon successful review by TSA, the TSA will transmit its authorization to the FAA for the assignment of a final reservation to operate into or out of DCA. Once FAA finalizes the reservation, the TSA will notify the aircraft operator.

3. The flight must be screened at and depart from a gateway airport as the last point of departure prior to arriving at DCA.
   a. Those airports are:
      i. BOS, Logan International Airport, Boston, MA
      ii. HOU, Hobby Airport, Houston, TX
      iii. HPN, Westchester County Airport, White Plains, NY
      iv. LEX, Blue Grass Airport, Lexington, KY
      v. LGA, La Guardia Airport, New York, NY
      vi. MDW, Chicago Midway International Airport, Chicago, IL
      vii. MSP, Minneapolis-St. Paul International Airport, Minneapolis, MN
      viii. PBI, Palm Beach International Airport, West Palm Beach, FL
      ix. PHL, Philadelphia International Airport, Philadelphia, PA
      x. SEA, Seattle-Tacoma International Airport, Seattle, WA
      xi. SFO, San Francisco International Airport, San Francisco, CA
      xii. TEB, Teterboro Airport, Teterboro, NJ
   b. TSA personnel will screen the aircraft and passengers
   c. All crewmembers and passengers must carry government-issued picture identification
   d. If the aircraft is equipped with a cockpit door, it must be closed and locked (if applicable) at all times during the operation of the aircraft to or from DCA, unless the FAA requires the door to remain open for safety reasons
4. The operator must ensure that it has at least one armed security officer on board who meets the requirements of the IFR. TSA may require more than one armed security officer on board for flights with large numbers of passengers. The TSA may elect to provide Federal Air Marshals for certain flights.

5. The operator must conduct the flight under instrument flight rules with an instrument flight plan.

6. The operator must ensure that it carries no prohibited items on board any flights to or from DCA.

So What Will All This Cost Me?

1. $15 for each passenger and crewmember that the operator submits to TSA as part of the flight approval process
2. $296/round trip for security screening services provided by the TSA
3. Fees for the armed security officer
4. FBO fees

Armed Security Officer Requirements

Who can act as an armed security officer?

1. **Qualified Active Law Enforcement Officers.** This individual:
   a. Is an employee of a governmental agency
   b. Is authorized by law to engage in or supervise the prevention, detection, investigation or prosecution of, or the incarceration of any person for, any violation of law
   c. Has statutory powers of arrest
   d. Is authorized by the agency to carry a firearm
   e. Is not the subject of any disciplinary action by the agency
   f. Is not under the influence of alcohol or another intoxicating or hallucinatory drug or substance
   g. Is not prohibited by federal law from receiving a firearm

2. **Qualified Retired Law Enforcement Officers.** This individual:
   a. Retired in good standing from service with a public agency as a law enforcement officer, other than for reasons of mental instability
   b. Before such retirement, was authorized by law to engage in or supervise the prevention, detection, investigation, or prosecution of, or the incarceration of any person for, any violation of law, and had statutory powers of arrest
   c. Before such retirement, was regularly employed as a law enforcement officer for an aggregate of 15 years or more, or retired from service with such agency, after completing any applicable probationary period of such service, due to a service-connected disability, as determined by such agency
   d. Has a non-forfeitable right to benefits under the retirement plan of the agency
   e. Is not under the influence of alcohol or another intoxicating or hallucinatory drug or substance
   f. Is not prohibited by federal law from receiving a firearm

3. **Other Individuals.** Any individuals other than active or retired law enforcement officers must:
   a. Meet qualifications established by TSA, in conjunction with the Federal Air Marshal Service, in the Armed Security Officer Program
b. Not be under the influence of alcohol or another intoxicating or hallucinatory drug or substance
c. Not be prohibited by federal law from receiving a firearm

What Is Required for an Armed Security Officer to Participate in the DASSP?

1. The armed security officer must undergo a fingerprint-based CHRC that does not disclose that he/she has a criminal offense that would disqualify him or her from possessing a firearm under 18 USC 922(g)
2. The armed security officer must submit the following information to TSA:
   a. Legal name, including first, middle and last; any applicable suffix; and any other names used
   b. Current mailing address, including residential address if different than current mailing address
   c. Date and place of birth
   d. Citizenship status and date of naturalization if the individual is a naturalized citizen of the United States
   e. Alien registration number, if applicable
   f. Social Security number is requested to expedite the threat assessment process, but is not required
3. An operator may not use an armed security officer if notified by TSA that the armed security officer may pose a security threat
4. The armed security officer must comply with Armed Security Officer Program issued by TSA

Questions & Answers

1. Q: My flight is delayed leaving the gateway airport or in flight due to weather. Will I be forced to divert or cancel the flight?
   A: No. TSA recognizes that there are operational and safety reasons that will delay flights from meeting their assigned slot reservations. TSA and FAA will work with aircraft operators to facilitate late flights due to weather.
2. Q: My flight is delayed leaving the gateway airport due to late arriving passengers or other non-Air Traffic Control-related reasons. Will I be forced to divert or cancel the flight?
   A: Probably. TSA will not accept reasons other than weather and ATC delays as valid reasons for delayed flights.
3. Q: My flight out of DCA will have more passengers than I arrived with. How can I accommodate these passengers?
   A: TSA encourages aircraft operators to submit all potential passenger names in advance of the flight (at least 24 hours in advance of the aircraft departure). Not all submitted passengers need to be on the aircraft for each leg into and out of DCA. Changes to any aspect of the flight (flight plan, passenger manifest, etc.) within 24 hours of departure will “restart” the 24-hour clock and may forfeit the slot reservation assigned by the FAA.
4. Q: For safety reasons, my aircraft needs to land after departure from a gateway airport but before arriving at DCA. Can I continue to DCA after resolving the safety issue?
   A: No. The TSA will require the operator to restart the slot reservation and manifest submission requirements. The flight also will need to depart from a gateway airport.

For more information, review TSA’s list of “Permitted and Prohibited Items,” provided on pages that follow.
Permitted and Prohibited Items

Prohibited items are weapons, explosives, incendiaries, and include items that are seemingly harmless but may be used as weapons—the so-called “dual use” items. You may not bring these items to security checkpoints without authorization.

If you bring a prohibited item to the checkpoint, you may be criminally and/or civilly prosecuted or, at the least, asked to rid yourself of the item. A screener and/or Law Enforcement Officer will make this determination, depending on what the item is and the circumstances. This is because bringing a prohibited item to a security checkpoint—even accidentally—is illegal.

Your prohibited item may be detained for use in an investigation and, if necessary, as evidence in your criminal and/or civil prosecution. If permitted by the screener or Law Enforcement Officer, you may be allowed to: consult with the airlines for possible assistance in placing the prohibited item in checked baggage; withdraw with the item from the screening checkpoint at that time; make other arrangements for the item, such as taking it to your car; or, voluntarily abandon the item. Items that are voluntarily abandoned cannot be recovered and will not be returned to you.

The following chart outlines items that are permitted and items that are prohibited in your carry-on or checked baggage. You should note that some items are allowed in your checked baggage, but not your carry-on. Also pay careful attention to the “Notes” included at the bottom of each section – they contain important information about restrictions.

The prohibited and permitted items chart is not intended to be all-inclusive and is updated as necessary. To ensure everyone’s security, the screener may determine that an item not on the prohibited items chart is prohibited. In addition, the screener may also determine that an item on the permitted chart is dangerous and therefore may not be brought through the security checkpoint.

The chart applies to flights originating within the United States. Please check with your airline or travel agent for restrictions at destinations outside of the United States.

For updates and for more information, call our Consumer Response Center toll-free at 1-866-289-9673 or email TSA-ContactCenter@dhs.gov.
