

DEDICATED TO HELPING BUSINESS ACHIEVE ITS HIGHEST GOALS.

## NBAA AIR TRAFFIC SERVICES

For nearly 20 years, NBAA AirTraffic Services (ATS) has assisted members directly from the FAA AirTraffic System Control Command Center. Our team of experts collaborate with FAA every day to advocate for business aviation interests in the National Airspace System.

Your organization's time is precious. Learn how NBAA ATS can help increase your efficiency and maximize the value of your business aircraft.

## WHAT CAN AN ATS SUBSCRIPTION DO FOR YOU?

NBAA's Air Traffic Services (ATS) team is plugged into everything that's happening in the National Airspace System. When you combine access and expertise, you get solutions that benefit companies like yours.

### REDUCE YOUR COSTS

- For most operators, reducing flight time by just one hour can save thousands of dollars.
- On average, if ATS can save your flight operation just two hours during the course of a year, the subscription pays for itself. Most subscribers see annual savings far in excess of this.

### REDUCE YOUR ATC-RELATED DELAYS

- By providing advance, accurate and detailed information to improve your flight planning, ATS can help your operation minimize or avoid delays, particularly during bad weather events or high-volume periods.
- Subscribers encountering flight delays can directly contact ATS to obtain guidance and recommendations for shortening or avoiding those delays.

### GET MORE ACCURATE INFORMATION

- With the detailed summaries that ATS provides to your flight operation, along with direct phone and email access to our air traffic management specialists, your flight crews are able to provide much more accurate and timely information to your passengers about delays that might affect them.

### UNIQUE SUBSCRIPTION OPTIONS TO FIT YOUR OPERATION'S NEEDS

NBAA Air Traffic Services subscriptions are offered in three categories:

#### Premier

Flight-specific assistance from NBAA's team on the FAA Air Traffic Control System Command Center floor.

#### Updates

Daily briefings on important issues in the National Airspace System that may affect your operation.

#### Service Provider

Enhanced offerings for flight planning service providers.
